

CIS 102

Web page Design Concepts Paper Assignment Description Lower Columbia College

Assignment Goal:

Students will review current literature related to course content on a subject of interest and prepare a paper summarizing their findings. Students will use their best writing skills in completing a college level paper in completion of this assignment.

Assignment requirements:

Read a minimum 3 full page articles or journal on some topic of your choice directly related to Web page design. You may read more than one article to total the 3 page or more minimum. The article may not be a product review, tutorial, or commentary. Periodicals, Computing Journals, and the Internet may be used as valid sources for readings.

The paper format should follow standard college level writing criteria, be sure and use proper citations when using other peoples' words. The paper should be a summary in your words which may include some comments about the topic from yourself. Paper length should be minimum one page single space 1" margins. Be sure and reference reading source properly so I can read the information for myself if I choose to. Submission should be in typed paper form.

Due Date: See Syllabus
