

CIS 102

Web Page Design

Page assignment 4

Lower Columbia College

Assignment Goal:

Apply principles of Web page design from Introductory reading and CH 1-14 of text.

Specifically:

1. Proper use of DOCTYPE
2. Folder and File conventions
3. Beginning coding: Title, Section Headers, Paragraphs, Name elements for linking and styles
4. Include tables and lists with styles applied.
5. All presentational Layout must be done with Styles

Assignment requirements:

1. Add to your existing pages from previous assignment with new pages including Styles.
2. No deprecated code.
3. Apply styles to text and graphics using methods from reference book and our discussions in class.
4. You must have linked styles. You may use other style implementation methods but limit the amount.
5. Must have a minimum of ten **different** types of styles applied.
6. Page(s) must include table with rowspan and colspan.
7. Page(s) must include an ordered list and an unordered list.
8. Code must pass W3C validator tests. www.w3c.org

You must Linked styles
